

SMI: two-layer connectivity diagrams

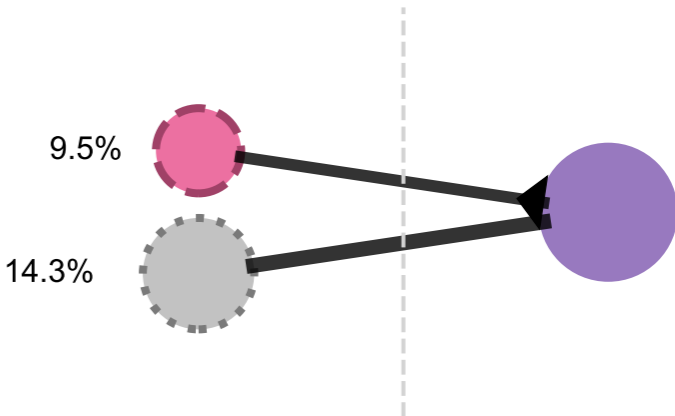

Ipsilateral input synapses

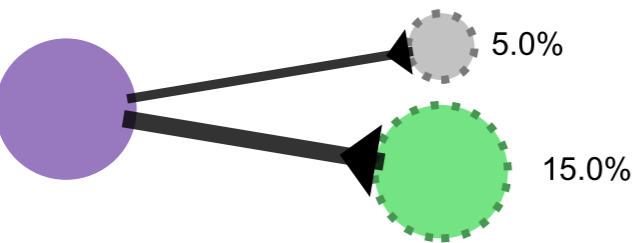

Legend

- Excitatory (solid black line)
- Inhibitory (dashed black line)
- Mixed (dotted black line)
- axon caudal (black solid circle)
- axon rostral (white solid circle)
- contralateral motion integrator (pink solid circle)
- ipsilateral motion integrator (orange solid circle)
- motion onset (blue solid circle)
- myelinated (green solid circle)
- not functionally imaged (gray solid circle)
- other functional types (red solid circle)
- slow motion integrator (seed population) (purple solid circle)
- axon exits rostrally & caudally (black and white solid circle)

Contralateral input synapses

Ipsilateral output synapses

Contralateral output synapses
