

# iMI+: two-layer connectivity diagrams

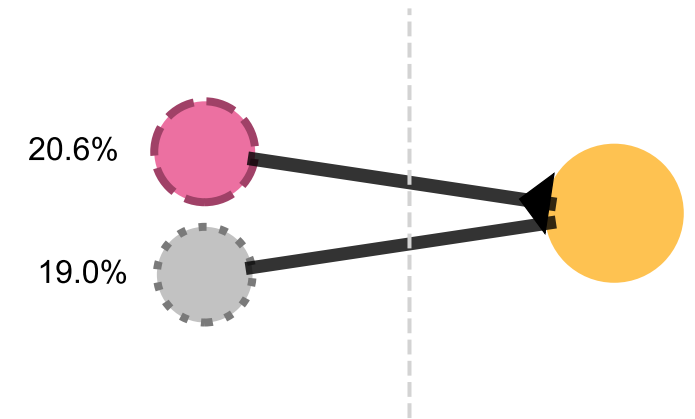

## Ipsilateral input synapses

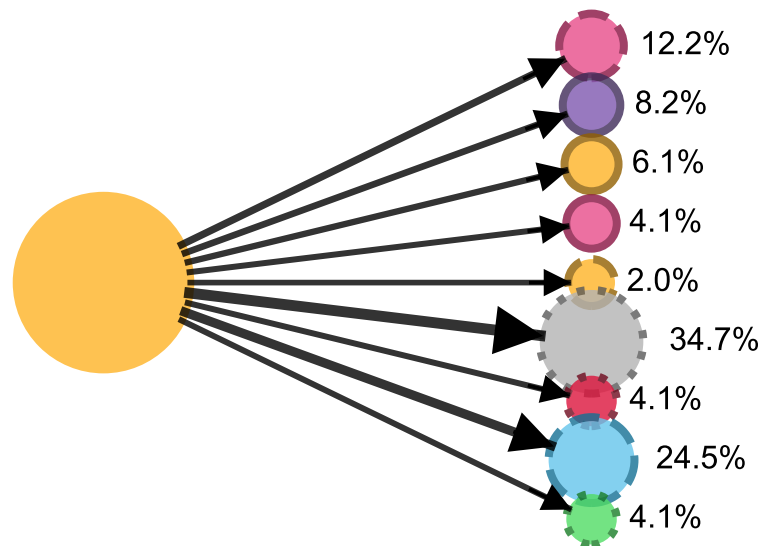

## Legend

- Excitatory (solid black line)
- Inhibitory (dashed black line)
- Mixed (dotted black line)
- axon caudal (solid dark grey)
- axon rostral (dashed black)
- contralateral motion integrator (solid pink)
- ipsilateral motion integrator (seed population) (solid yellow)
- motion onset (solid light blue)
- myelinated (solid green)
- not functionally imaged (dashed grey)
- other functional types (solid red)
- slow motion integrator (solid purple)
- axon exits rostrally & caudally (solid black)

## Contralateral input synapses

## Ipsilateral output synapses

## Contralateral output synapses
