

cMI: two-layer connectivity diagrams

Ipsilateral input synapses

Contralateral input synapses

Cell outlines

- Excitatory outline
- - Inhibitory outline
- · - Mixed / unknown outline

Ipsilateral output synapses

Contralateral output synapses

Functional types

- axon caudal
- axon rostral
- contralateral motion integrator (seed population)
- ipsilateral motion integrator
- motion onset
- myelinated
- not functionally imaged
- other functional types
- slow motion integrator
- axon exits rostrally & caudally

Fraction of synapses & connectors

- 0.01
- 0.1
- 0.5
- Excitation
- ← Inhibition
- Unknown
