

# cMI: two-layer connectivity diagrams

Ipsilateral input synapses

Contralateral input synapses

Cell outlines		
—	Excitatory outline	
- -	Inhibitory outline	
···	Mixed / unknown outline	

Functional types		
■	axon caudal	
□	axon rostral	
■	contralateral motion integrator (seed population)	
■	ipsilateral motion integrator	
■	motion onset	
■	myelinated	
■	not functionally imaged	
■	other functional types	
■	slow motion integrator	
■	axon exits rostrally & caudally	

Ipsilateral output synapses

Contralateral output synapses

Fraction of synapses & connectors	
—	0.01
—	0.1
—	0.5
→	Excitation
←	Inhibition
●	Mixed
—	Unknown
